

TRAINING

Driver CPC Training

A Quality Product for Professionals

Certificate of Professional Competence (CPC)

PTF Training has developed a variety of Driver CPC training Modules to meet the needs of the modern Petrochemical, General Haulage and PCV transport sectors.

All of our 12 individual Modules count towards your drivers CPC periodic training qualification. Each Module is 3 fh hours in duration and any two can be mixed to provide a full day (7hrs) of training. This gives better flexibility to meet specific driver and company requirements.

All drivers will be required to complete a minimum of 35 hours of periodic training within every 5year period.

“PTF and Flogas have worked in partnership for the last year, we have found their training very useful for our drivers with good feedback from the all. It will also give Flogas a safer better driver reducing our fuel costs and accident damage”

Brian Laughlin
National Training Manager (Flogas)

Training for a Safe Future
